Who I am

I'm a Front End Developer and I am very adaptive to different ways of working. I believe that the most important thing is to learn the basics very well and determine the best approach for the team and the product overall. I love to have side projects to experiment with new technologies and to practice new things that I learn on my way. I really love what I do and I am continuously learning and developing my skills.

Skills

React Html Css Redux Nextjs Gatsbyjs Storybook Github actions
Electron Typescript

Side Projects

Personal Site

Personal site developed with Gatsby

Skills:

Gatsby React Html Css
